LAB-2 Programs

Q1. a. Make a web page to include two Html links. Assume the link text yourself. On click of both the links, Google.com should open. But, on the click of first link, Google.com should open in the same tab, whereas on the click of second link, Google.com should open in a new tab.

b. Use Html links to send an email to me at btech.cse5.webtech@gmail.com, with a subject "Assignment" and the message text as "Submitted".

Q2. Take an image of the Indian map, and make any three states clickable using image maps. Perform different functions on the click of each state.
